

HAWL EXTEND

HAWL EXTEND is the second part of the HAWL Expert Membership area, consisting of around 50 audio lectures and talks, helping HAWL Farmers to further their homeopathic education, knowledge and understanding.

Our HAWL teachers and speakers are all world leaders in their field - homoeopathic vets, pharmacists and professional homoeopaths who have lived or worked on farms for many years and give us a wealth of experience.

While some topics are repeated, each lecturer adds depth to the subject, to help you really understand it from a wealth of different perspectives.

Some tracks begin with the speaker talking to the audience, and may appear to start mid-track, where a recording has been split into useful subjects. While the quality of the recordings varies, the content is exclusive, first class and often groundbreaking, which is why we want to make these invaluable lectures available for our HAWL farmers past and present.

Happy Listening!

Track	Title	Background
1	Track 1 The value of Farm Homeopathy - Geoff Johnson	Vet Geoff Johnson explains why he finds homoeopathy so valuable for the good health of farm animals
2	Track 2.1 Homeopaths do it better - How we look at disease	Chris Aukland discusses why using a homoeopathic approach on a farm gives a better understanding of health and how to achieve it. In 2010 Chris was working on how best to support HAWL farmers and whether their feedback would show that a homoeopathic approach created a healthier farm. 'Homoeopaths do it better' concludes that the conventional and homoeopathic concepts have common ground, but that the homoeopathic thought process is wider and offers the farmer an advantage.
3	Track 2.2 Homeopaths do it better - What is a farm - Chris Aukland	
4	Track 2.3 Homeopaths do it better - What is a healthy farm	
5	Track 2.4 Homeopaths do it better - What is a homeopathic approach	
6	Track 3 Understanding what needs to be cured - Annie Batchelor	Good remedy selection relies on good case taking, which relies on finding the totality. When observing and examining an animal it is vital to use all our senses - look, listen, touch, smell - to identify what animal is showing you.
7	Track 4.1 Finding the right remedy Part 1 - Sue Warner	Sue Warner discusses case taking, and revises repertorisation to help find the right remedy.
8	Track 4.2 Finding the right remedy Part 2 Hitting the bullseye	

9	Track 5 An introduction to keynotes - Annie Batchelor	This talk introduces the concept of keynotes - themes which run through remedies. Recognising these can help speed up remedy selection.
10	Track 6.1 Remedies - Conium - Jenny Grist	Homeopath and dairy farmer Jenny Grist describes two remedies, explaining how will recognise the need for them
11	Track 6.2 Remedies - Hepar Sulph - Jenny Grist	
12	Track 7 Remedies - Lycopodium and Nux Vomica	Geoff Johnson differentiates two possible remedies for digestion problems
13	Track 8 Remedies - Lac defloratum - Geoff Johnson	The lac-d proving, remedy picture and its use on the farm.
14	Track 9 Remedies - Thuja - Bali Martindale	Bali Martindale discusses the use of the remedy thuja on the farm
15	Track 10.1 Remedies - Staphysagria - Geoff Johnson	These snippets of useful remedies are taken from longer talks on HAWL extension days. They offer simple pictures of when and why each remedy might be used during an animal's year or to help the animal back on track, when they are off par.
16	Track 10.2 Remedies - China Officinalis - Geoff Johnson	
17	Track 10.3 Remedies - Urtica - Geoff Johnson	
18	Track 10.4 Remedies - Kali Carb - Geoff Johnson	
19	Track 10.5 Remedies - Colchicum and Mag Phos - Geoff Johnson	
20	Track 10.6 Remedies - The Weather and thinking ahead	
21	Track 11.1 Remedies - Weather Remedies - Stress	Homoeopathic vet Geoff Johnson introduces remedies affected by the weather, when they can be used on the farm, related rubrics, and various repertories.
22	Track 11.2 Remedies - Weather Remedies - Adaption to change	
23	Track 11.3 Remedies - Weather Remedies - Weather remedies	
24	Track 12 - Remedies - More weather remedies - Geoff Johnson	Looking at the weather as a stress, as the cow's energy is diverted from production to fighting disease.
25	Track 13.1 The Animal Year Part 1 - Geoff Johnson	Geoff Johnson talks about his work with farmers and suggests remedies which may be integrated into health planning for different stages of the animal's development or farming year.
26	Track 13.2 The Animal Year Part 2 - Geoff Johnson	
27	Track 14 Health planning - Geoff Johnson	How to plan ahead for potential stresses and avoid unnecessary problems

28	Track 15 Fitting remedies into farm management strategy	Annie Batchelor revises the skill of case taking, finding a totality of symptoms to ensure a balanced case, and an accurate remedy selection, to help animals return from the dis-ease and stress, back to health.
29	Track 16.1 Routine stresses - Stress - Geoff Johnson	Thinking ahead to remove maintaining causes can prevent problems. But many stresses are unavoidable. Here Geoff explores some of the remedies which can be used to reduce the effects of routine stresses. Topics include birth, nutrition, and pre and post partum.
30	Track 16.2 Routine stresses - The adaption to change	
31	Track 16.3 Routine Stresses - The animal year - Geoff Johnson	
32	Track 17 Nosodes - Trevor Adams	A masterclass given by vet Trevor Adams discussing nosodes and the questions which arise within farming. What are you buying? What is in them? Do they work?
33	Track 18 Potency - Jenny Grist	Jenny and other homoeopaths discuss their thoughts on how to select the most appropriate potency.
34	Track 19 Potency - Questions around dosing and potency	Trevor Adams answers students' questions on how much to give, and how often; encouraging decisions based on the vitality of the animal and the nature of the problem.
35	Track 20.1 Fertility and Birth - Female fertility - Jenny Grist	Geoff Johnson and Jenny Grist discuss fertility and uterine problems. The students' comments are not easy to hear, but the information offered by Geoff and Jenny is invaluable.
36	Track 20.2 Fertility and Birth - Questions on infertility and abortion	
37	Track 21.1 Fertility and Birth - Birth damage - Trevor Adams	Trevor Adams talks with farmers about his own experiences of using remedies to assist in birth and help with some of the problems which may occur.
38	Track 21.2 Fertility and Birth - Birth respiration - Trevor Adams	
39	Track 21.3 Fertility and Birth - Birth collapse - Trevor Adams	
40	Track 22 A case of mastitis - Geoff Johnson	Geoff Johnson shows the vital importance of detailed observation in finding the right remedy in difficult cases
41	Track 23 Scours / diarrhoea - Jenny Grist	Calf scour remedies including nux, chin, ars, ant-c and calc-p
42	Track 24.1 Four Cases - Case of Blossom - Bali Martindale	Try to stop the recordings before the remedy is given, to reportorise each case for yourself. Each case goes on to give the chosen remedy, and description of that remedy. This is a masterclass by Bali Martindale,
43	Track 24.2 Four Cases - Case of Marion - Bali Martindale	

44	Track 24.3 Four Cases - Case of Mary - Bali Martindale	homoeopath, herdsman and mastercraftswoman - one of very few homoeopaths perhaps in the world who are also farmers. Bali has successfully used homoeopathy on many large dairy farms.
45	Track 24.4 Four Cases - Case of Sheila - Bali Martindale	
46	Track 25 Case taking - Geoff Johnson	Vet Geoff Johnson discusses cases to teach the skills of good case taking
47	Track 26 Using homeopathy on a small sheep farm - Annie Batchelor	Annie presents several cases from her work on a local sheep farm where the owners, already committed to holistic practice, asked her to help improve their use of homoeopathy for specific problems.
